

## Editorial

Dear Readers,

Our two new columnists, Douglas Lyon (Fairfield University) and John McGregor (Clemson University) continue their work in this issue. I welcome back Dave Thomas who again graces our pages with his wisdom. It is also a pleasure to include columns by our other “regulars” including Anthony Simmons, Won Kim, Mahesh Dodani, and Don Firesmith. I too have continued my Educator’s Corner series in this issue. Our book reviewer, Charles Ashbacher, has posted a review of *Exploiting Software: How to Break Code*, by Greg Hoglund and Gary McGraw.

In addition to these eight columns and book review we have four feature-length papers. Summaries of each are included next to their links.

Hope you find this issue of JOT useful.

Cheers,

Richard Wiener
