

Editorial

Dear Readers,

We have a full plate of columns in this issue. Wes Munsil has written a Guest Column. My Educator's Corner is back with a column about generics in Java 1.5 and C# 2.0. Our regular columnists Won Kim, Mahesh Dodani, Anthony Simons, Douglas Lyon, John McGregor and Don Firesmith grace our pages once again. We also have a software review and a book review.

In addition to these columns we have four feature-length papers. Summaries of each are included next to their links.

Hope you find this new issue of JOT useful.

Cheers,

Richard Wiener
