JOURNAL OF OBJECT TECHNOLOGY

Editorial

Dear Readers,

I am pleased to announce a new regular column by Sven Apel and Christian Kastner. Their work will focus on feature-oriented software development. We welcome them. They are joined by our other regular columnists Dave Thomas, Mahesh Dodani, Doug Lyon and John McGregor. Their work is greatly appreciated.

Our five feature length papers deal with an unusal variety of subjects that I believe you will find interesting and useful.

Best regards

Richard Wiener
