

## Editorial

Dear Readers,

This issue contains the last of a series of columns by Lakshmi Prayaga (at least for awhile). I thank her and her coauthors for this informative series. We have another Guest Column in this issue that I believe you will enjoy. In addition, we have regular columns by Douglas Lyon, Mahesh Dodani, John McGregor, and me. We also have two short book reviews by Charles Ashbacher.

Our five feature papers deal with modeling, UML and service architectures.

Hope you find this issue useful.

Richard Wiener
